1. My assigned security awareness course isn't showing Symptom: The course is not listed under "My Learning" or "Assigned to me". Likely cause: The assignment hasn't synced, the start date is in the future, or you are signed in with a different account.

Steps: 1. Check you are signed in with your work account. 2. Refresh the page and clear your browser cache. 3. Check the start date in your assignment email. 4. Wait 30 minutes after being assigned and check again. Escalate: Still missing after 24 hours, or the due date is within 2 days.

2. My training shows "overdue" but I completed it Symptom: A completed course is marked overdue. Likely cause: Completion has not synced to your transcript, or the final step (quiz or acknowledgement) was not submitted.

Steps: 1. Open the course and confirm every module shows Completed. 2. Check you submitted the final quiz or acknowledgement. 3. Log out and log in again. 4. Wait up to 24 hours. Escalate: Still overdue after 24 hours. Take a screenshot of the course page and the transcript.

3. My completion certificate or transcript is missing Symptom: A finished course has no certificate or transcript entry. Likely cause: The record is still being generated, or a required step is incomplete.

Steps: 1. Check all modules and the final assessment are complete. 2. Open Transcript and clear any date filters. 3. Wait up to 24 hours. Escalate: Still missing after 24 hours.

4. I can't log in to the learning portal Symptom: Login fails or loops back to the sign-in page. Likely cause: Single sign-on session expired, a blocked cookie, or an incorrect account.

Steps: 1. Sign out of your work account fully and sign in again. 2. Try a private or incognito window. 3. Clear cookies for the portal. 4. Try another browser. Escalate: The same error appears in two browsers. Include the exact error message. Never share your password.

5. A course won't launch or the video won't play Symptom: Spinning wheel, black screen or an error when opening a course. Likely cause: Pop-up blocker, outdated browser, VPN or slow network.

Steps: 1. Allow pop-ups for the portal. 2. Update or switch your browser. 3. Disconnect from VPN and try again. 4. Disable ad-blocking extensions. Escalate: It fails in two browsers. Include the browser name and version, and any message in the browser console if you can see it.

6. I'm assigned the wrong curriculum for my role Symptom: The training plan doesn't match your team or role. Likely cause: Your department or job role is wrong in your profile.

Steps: 1. Check your department and role on your profile. 2. Note which curriculum you were assigned and which you expected. Escalate: Always, because curriculum changes need an administrator.

7. My manager can't see my team's completion status Symptom: A manager's report shows no data or missing employees. Likely cause: Reporting lines not set, or the report filter excludes some people.

Steps: 1. Check the report date range and filters. 2. Confirm the missing employees report to you in the directory. Escalate: The reporting line is wrong or the report is still empty. Include the report name and the names of the missing employees.

8. I need an extension on a mandatory training deadline Symptom: An employee can't finish before the due date. Likely cause: Leave, workload or a technical problem.

Steps: 1. Note the course name and the original due date. 2. Ask for the reason and the new date requested. Escalate: Always, because extensions need manager and administrator approval.

9. A course disappeared after a platform update Symptom: A course that was available is gone, or progress looks reset. Likely cause: Release changes, a re-assigned curriculum or a sync delay.

Steps: 1. Refresh and clear the cache. 2. Check your transcript for earlier progress. 3. Note the time the problem started. Escalate: Always when progress looks lost. Include screenshots from before and after if you have them.

10. I have a duplicate profile Symptom: Training history is split across two profiles. Likely cause: Re-hire, name change or a second email.

Steps: 1. Note both usernames or emails. 2. Don't complete training on the second profile. Escalate: Always, because merging profiles needs an administrator.
